

PUBLIC MEETING

GAS RUSH

Information night about onshore gas extraction in City of Greater Geelong

Speakers

- Dr **Merryn Redenbach**, Doctors for the Environment Australia
- Dr **Rye Senjen**, senior researcher with the National Toxics Network
- **Ben Courtice**, Yes2Renewables and Beyond Zero Emissions

Geelong Council seeks public submissions regarding onshore gas extraction methods. Taking a stand on this should not be about party politics. This is about our common future and what we would like it to be.

Before you send your own submission to Council, come and ask questions to a panel of independent authorities about onshore gas mining's impact on health, jobs, economy, environment, climate and ethics.

Moderator: Michael Martinez

Free admission. Thursday at 7:00–9:00pm
