

What

THE GREEN TRANSITION

Doing the work

Australia stands at the crossroads of the global transition towards climate rescue. We have the resources, skills, and people to build a sustainable future and secure a **SAFE CLIMATE**. This transition **creates jobs, establishes energy independence, ensures food and water security, restores natural landscapes, and drives innovation across multiple sectors.**

While other nations already benefit from this momentum, Australia's political delays squander our potential. We must elect leaders who recognise Australia's role in the global transition, remove barriers to innovation and sustainability, and empower Australians to act now.

**ENERGY
REVOLUTION
& INDEPENDENCE**

**GREEN
JOBS &
ECONOMIC
OPPORTUNITIES**

**CIRCULAR
ECONOMY**

**NATURE
RESTORATION
& REVEGETATION**

**FOOD &
WATER
SECURITY**

DEGROWTH

Why

We live in a

CLIMATE EMERGENCY

evidenced by:

- CATASTROPHIC WEATHER
- INCREASED ECONOMIC COSTS
- RECORD BREAKING HEAT
- ECOSYSTEM COLLAPSE
- NATIONAL SECURITY RISKS
- FOOD & WATER INSECURITY
- INCREASE MORTALITIES

Goal

We must

STOP & REVERSE

global heating to achieve a

SAFE CLIMATE

for a

LIVEABLE PLANET

Current goals are

1.5°C
2.0°C **UNSAFE**

How

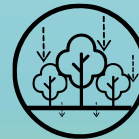

We have the tools to

MITIGATE

climate change

REDUCE
GHG emissions
to zero

REMOVE
excess heating
gasses

REFLECT
Energy from
the sun
